Best Idea For Presentation

Land Vision

Visual concept file of development ideas for your land

Request no.	City / district	Plot area	Issue date
LV-0000	**Riyadh · sample district**	**9,600 m²**	**– / – / 2026**

Illustrative sample of a hypothetical plot with AI-generated images. All data and figures in this sample are for illustration only and do not describe a real plot.

01 · One-page summary

Three ideas visualised on your plot

Client goal: **develop the land**. We read the site, its surroundings and the published plot regulations, and visualised three ideas the plot's size and streets can accommodate.

1. Residential buildings around a courtyard

Entrances from the quiet side streets.

2. Retail walk

Shopfronts on the main road.

3. Office tower on a retail podium

A corner tower overlooking both streets.

An idea we did not visualise, and why

Villa compound: villa entrances need quiet streets, while the main frontage is on a wide road. We can visualise it on request if it is among your ideas.

What this file is, and is not

A design and visualisation file that helps you see your plot's potential. **It does not rank ideas, and does not include real estate analysis or valuation.** Decisions follow specialist input, and the file ends with specific questions to take to them.

How to read this file

Each idea has its own page: an image on your land, the design description, and **questions for specialists**. The status beside each item shows whether it comes from an official source or needs confirmation.

Official source · Needs confirmation · Not available

02 · Plot and site data

What do we know about the plot?

Item	Value	Source and access date	Status
Location	24.xxxx, 46.xxxx	Client link + Google Earth Pro · —/—/2026	Confirmed
Area and dimensions	9,600 m² · about 120 × 80 m	Client data + Urban Maps (Balady)	Confirmed
Plan / plot no.	Plan ---- / Plot --	Client data	Confirmed
Frontages	Main frontage on a road about 40 m wide; two side streets	Measured on Google Earth Pro	Approximate
National address	----	SPL (National Address)	Not sent

Surrounding landmarks and their effect

Landmark	Approx. distance	Effect on the design
Main mosque	About 150 m	Walkways and plazas are oriented towards it for easy access on foot.
Existing shop row	Opposite, on the main road	The retail walk faces it, forming a continuous shopping street.
4-storey apartment buildings	On two sides	Residential ideas are shown at a similar height.
Schools and hospital	Within 1.5 km (to complete)	To be completed from Urban Maps.

Our reading of the site

A corner plot with three frontages in a residential district. The main road allows open frontages, while the side streets allow quiet entrances, so the plot can accommodate residential, commercial and mixed ideas in design terms.

03 · Design reference

Published regulations, and what needs confirmation

Item	What we found	Source	Status
Land use	Residential-commercial on the main frontage	Urban Maps · Balady platform	Official source
Permitted floors	To be completed from plot regulations	Urban Maps · Balady platform	Needs confirmation
Coverage and setbacks	To be completed	Plot building regulations	Needs confirmation
Required parking	Depends on the activity	Activity requirement guides · Ministry of Municipalities and Housing	Needs confirmation

In a real file we report what is shown for the plot as is, and mark what needs confirmation from the municipality or an engineering office before design.

04 · What it means for the design

How we built the vision within these givens

Given	Effect on the vision
Three frontages	Main entrances on the main road, quiet entrances from the side streets.
Height of surrounding buildings	Residential ideas shown at a similar height; the tower shown as conditional on permitted height.
Mosque and nearby landmarks	Plazas and walkways oriented towards them for access on foot.

Please note: this is a design reading of the site. Demand, price and feasibility studies are the work of a licensed real estate consultant.

05 · Idea 1

Residential buildings around a shared courtyard

Three mid-rise apartment buildings around a courtyard with a pool and children’s area, with entrances from the quiet side streets.

Design idea

- Three mid-rise blocks close to the height of surrounding buildings.
- Entrances from the quiet side streets.
- A shared central courtyard with a pool and children’s area.

What the vision shows

The courtyard lets most apartments overlook a green interior away from the road.

Questions to take to specialists

- How many floors are allowed, and what coverage? (engineering office)
- What parking is required for the number of units? (engineering office)
- What is apartment demand in the district? (licensed real estate consultant)

The image is an early concept of the idea on the plot photo, not an architectural design or approved plan.

06 · Idea 2

Open-air retail walk

Two rows of two-storey shops and cafés around a shaded pedestrian walkway, with parking on the main frontage.

Design idea

- Two rows of two-storey shops around a shaded walkway.
- Shopfronts on the main road.
- Parking on the frontage and a central plaza with a fountain.

What the vision shows

The shaded inner walkway makes the vision a place to walk and sit, not just a row of shops.

Questions to take to specialists

- Is commercial use allowed on this frontage? (engineering office)
- How much parking is needed, and how much land does it take? (engineering office)
- What is demand for retail space in the district? (licensed real estate consultant)

The image is an early concept of the idea on the plot photo, not an architectural design or approved plan.

07 · Idea 3

Office tower on a retail podium

An office tower on a three-storey retail podium, with a forecourt on the main road and parking behind.

Design idea

- A tower on the plot corner overlooking both streets.
- A three-storey retail podium and a forecourt on the main road.

What the vision shows

The vision shows the effect of height on the district, to make it easier to discuss with specialists.

Questions to take to specialists

- What height is allowed? The decisive question for this idea. (engineering office)
- What is office demand in this part of the city? (licensed real estate consultant)
- What are the approximate construction cost and time? (engineering office or contractor)

The image is an early concept of the idea on the plot photo, not an architectural design or approved plan.

08 · Visual comparison

The three ideas side by side

Residential

Retail walk

Office tower

Item	Residential	Retail walk	Office tower
Relation to the street	Quiet side entrances	Frontage on the main road	Corner overlooking two streets
Height in the vision	Close to surroundings	Two storeys	Above surroundings
Decisive question for specialists	Number of floors	Commercial use and parking	Permitted height

The file does not rank the ideas. Take the decisive questions to specialists, then come back to us with the idea you choose.

09 · Next step

Who do you go to after this file?

1. **Engineering office:** confirm the final plot regulations (floors, coverage, setbacks, parking).
2. **Real estate consultant licensed by REGA:** market and feasibility study for the ideas you are interested in.
3. **Graphics House:** architectural concept and marketing visuals of the chosen option, for a partner, financier or off-plan sales. **The fee for this file is credited against any later contract.**

10 · How we prepared this file

A vision built on your plot, not random images

A design and visualisation file built on your real plot location and the published regulations as a design reference, prepared by an architectural team so you can see the potential before going to specialists.

Stage	What we do	Source
1. Site reading	Boundaries, frontages, roads and surrounding landmarks.	Google Earth Pro · Google Maps · client photos
2. Design reference	Land use and the regulations available for the plot.	Urban Maps on the Balady platform (Ministry of Municipalities and Housing)
3. Choosing ideas	Up to three ideas suited to size and context; ideas that do not fit are excluded with reasons.	Graphics House architectural team · 15+ years in the Saudi market
4. Visualisation	An image of each idea on your own plot photo.	Visualisation and AI tools, with human review
5. Questions	Specific questions for each idea to take to specialists.	Graphics House team

Limits of this file

- A design and visualisation service; it does not include real estate consultancy, analysis or investment ranking.
- No valuation of land or units, and no feasibility study.
- Not an engineering design or approved plan; the images are early concepts.
- Final regulations are approved by the relevant municipality.
- Every item taken from a source states the source and access date.
